

# Samantha's Scrunchie Combs

## Halo Instructions

### Step One

Dampen hair with a spray bottle of water or after washing hair.

### Step Two

Part the hair across top of the head from ear to ear. Now part the hair one inch above the ear from the existing part line towards the face. Repeat on the other side.

### Step Three

Twist and place the front group of hair into a clipper, out of the way.

### Step Four

Place the front of the Halo on the part line, starting on the left side take about one inch of hair that is in front of the ear and twist this braid of hair about three times (to keep hair together). Now loop this braid over and then under the Halo, once.

### Step Five

Now add this braid to another inch of hair that may be on or behind the ear, then twist as before and loop over and then under the Halo. Continue this until you are left with one inch of hair, and the hair that is in the clipper.

### Step Six

Release the clipped hair and continue with braiding as before, until you are left with the last inch of hair, loop over the Halo and bobby clip as close to the Halo as possible. Now tuck the remaining hair under the Halo, hiding the loose ends. You can now lightly spray with hair spray.
